one time service	20,00 BGN	10,23 €	up to 5 working days
subscription service (12 months)	159,50 BGN	81,55 €	20 working days*
Description: The service represents information from the customer invoice systematized by sites. The MS Excel format allows easy processing and sorting by different criteria, such as voltage level, tariffs, network services, etc.			
* The specified term is for a subscription starting from the month of service request.			
10. Inquiry for the invoiced price for products with exchange price			
one time service	19,50 BGN	9,97 €	up to 5 working days
subscription service (12 months)	55,00 BGN	28,12 €	20 working days*
Description: The report is suitable for customers with concluded contracts for products with a directly related to the energy exchange price, who want to understand in detail how their final electricity price is formed in the issued invoice. The inquiry contains detailed information on the prices and quantities of the customer (calculated according to the assigned typical profile or measurements for the sites) by each settlement period for the invoiced period.			
* The specified term is for a subscription starting from the month of service request.			

11. SMS Notification

subscription service (12 months)	16,80 BGN	8,59 €	up to 5 working days
---	------------------	---------------	-----------------------------

Description: Text message sent to customer's mobile number to inform about energy invoice issue date, date of maturity or in the event of electricity supply disconnection. The service is provided per customer ID for 12-month subscription period.

12. Site-specific measurements by settlement periods report

one time service (for 1 month)	first site	18,80 BGN	9,61 €	up to 20 working days
	next site	9,40 BGN	4,81 €	
subscription service (12 months)	first site	47,00 BGN	24,03 €	up to 20 working days
	next site	23,50 BGN	12,02 €	
for customers with 50 or more sites	according to an individual offer			

Description: The service is applicable only for customers with mounted devices with measurement by settlement periods. It represents sent by email MS Excel report for the amount of active electric power for each site measured by settlement periods.

13. Issuing an electricity consumption inquiry based on customer needs

according to an individual offer

Description: Electricity consumption inquiry meeting customer individual needs and preferences. It is implemented after clarifying the specific customer requirements.

14. Assistance in changing ownership - submission of documents, conclusion of the necessary contracts and other necessary administrative activities

56,50 BGN	28,89 €
------------------	----------------

Description: The indicated price is for assistance in changing the ownership for one site. In order to perform the service, it is necessary for the customer to authorize EPRES in advance with the rights to perform the necessary activities (to be represented in the relations with the grid operators).

15. Participation in a standard balancing group

according to an individual offer

Description: Concluding a contract for participation in a standard balancing group which transfers the responsibility for balancing of the respective sites to ENERGO-PRO Energy services EAD in his capacity of a coordinator. The results from the forecast and reported amounts of the consumption of these sites become part of the settlement of the group. The service is suitable for big industrial customers with hourly measurement irrespective whether their contracts for supply of electricity are concluded with ENERGO-PRO Energy services EAD or another supplier.

16. MyEnergy

12 months subscription	monthly fee for 1 site	49,50 BGN	25,31 €	up to 30 days from the contract signing date
	additional meter reading device*	36,50 BGN	18,66 €	
24 months subscription	monthly fee for 1 site	36,50 BGN	18,66 €	up to 30 days from the contract signing date
	additional meter reading device*	27,00 BGN	13,80 €	

Description: The service represents a subscription-based access to a web-based platform with real-time electricity consumption data on sites after the installation of specialized equipment. The service can be used by all users regardless of the voltage level of the grid to which sites are connected, as well as the needs of usage - household or commercial. A client may use the service for more than one site by paying the full monthly fee for each one of them. In case a site requires the installation of more than one device, each additional device increases the monthly fee for the respective site by the corresponding amount on subscriptions.

The service is applicable for sites on the territory of the regions of Varna, Ruse, Dobrich, Shumen, Targovishte, Razgrad, Veliko Tarnovo, Silistra and Gabrovo.

* If the installation of a given site does not allow consumption to be measured with a single device, the monthly fee for that site shall be increased by the specified amount for each additional measuring device installed for the service.

17. Energy efficiency audit

according to an individual offer

Description: Energy efficiency audit of buildings, enterprises, industrial systems and outdoor artificial lighting systems. Issuing energy performance certificates for buildings. Assessment of achieved energy savings.
