15 Participation in a standard balancing group

according to an individual offer

Description: Concluding a contract for participation in a standard balancing group which transfers the responsibility for balancing of the respective sites to ENERGO-PRO Energy services EAD in his capacity of a coordinator. The results from the forecast and reported amounts of the consumption of these sites become part of the settlement of the group. The service is suitable for big industrial customers with hourly measurement irrespective whether their contracts for supply of electricity are concluded with ENERGO-PRO Energy services EAD or another supplier.

16 Participation in a combined balancing group

according to an individual offer

Description: The service is applicable only for producers of electric power from renewable energy sources with contracts for obligatory buy back and represents concluding a contract for participation in a combined balancing group, which transfers the responsibility for balancing of the respective sites to ENERGO-PRO Energy services EAD in its capacity of coordinator. The results from the forecast and reported amounts for the generation of these sites become part of the settlement of the group.

17 Energy efficiency audit

according to an individual offer

Description: Energy efficiency audit of buildings, enterprises, industrial systems and outdoor artificial lighting systems. Issuing energy performance certificates for buildings. Assessment of achieved energy savings.

Description: Covering costs incurred in connection with disconnected and reconnected electricity supply to customers who have not paid their due amounts within the specified deadlines or are in default of other contractual relationships. If a power supply disconnection occurs, the reconnection is made after payment of the service price as well as the amounts due by the customer for the respective site and the statutory interest for late payment.

2	Disconnection and reconnection of electricity supply for a customer's site, disconnected due to non-fulfillment of obligations, for which ENERGO-PRO Energy Services EAD is a previous supplier	69,00	according to the terms of the grid operator
	previous supplier		

Description: Covering costs incurred in connection with disconnected and reconnected electricity supply to customers who have changed their supplier, but have not paid their due amounts within the specified deadlines or are in default of other contractual relationships with their previous supplier. If a power supply disconnection occurs, the reconnection is made after payment of the service price as well as the amounts due by the customer for the respective site and the statutory interest for late payment.

* The services are requested for performance to the respective grid operator within 2 working hours after receipt of the amount on the account and/or elimination of the non-performance, which led to disconnection of the supply.
